- Water Storage Improvements – Standpipe, City of New Deal
- Funded by the Texas Water Development Board (TWDB)
- Partially funded by Drinking Water State Revolving Fund (DWSRF) and Texas Community Development Block Grant Program (TxCDBG)
- The project involves the construction of a new 104,000-gallon capacity, welded steel standpipe with reinforced concrete foundation to increase the City's elevated water storage capacity and improve service water pressure throughout the system.
